

Is there an inborn wisdom of the body?

Basic Concepts

A frog sits on a lily pad and eats flies all day. A baby knows how to suck a thumb even before it's born. A seed sprouts, the roots grow down into the earth while the stem and leaves grow up towards the sun. How do they know how to do that? Chiropractors have a unique understanding of life and health. Health is more than how you feel, it's how you function and express yourself. Health is a state in which your body can express 100% of your human potential, 100% of your human spirit, and where your cells, tissues, organs, glands and systems are functioning 100%, 100% of the time. When the Webster's Unabridged Dictionary is examined do we question whether it was created by intelligence or whether it was a random event such as an explosion in a print shop? Of course not, the organization is much too complex to be a random event.

Just the same, as we observe the natural world around us we see complex design and order in our universe. There is little question that it was designed and is maintained by intelligence superior to our human intelligence. We call it Universal Intelligence. It is everywhere and in everything, even in plants, frogs and human beings. It is what gives us our instincts, and our information to survive, to thrive and to adapt in this ever-changing world. This inborn wisdom is smarter than all the scientists and doctors in the world. For example, this intelligence can take two cells and in 280 days create an infant child whether the mother is a PhD or a high school dropout. All the scientific minds in the world have been unable to create a living cell; yet this intelligence is able to create a whole body from the peanut butter and jelly sandwiches that a mother eats.

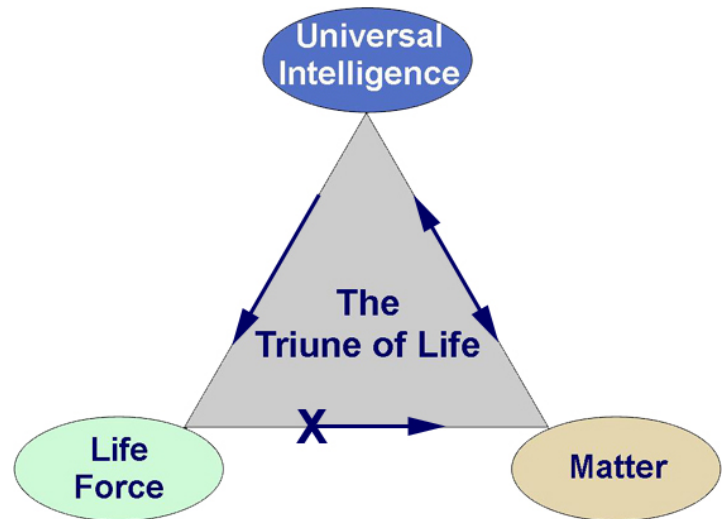

What does one of the world's greatest doctors say about our inborn intelligence?

Have you ever heard of Deepok Chopra, M.D.? He is one of the most well known authors and doctors in the health care field today. He says, "intelligence is present everywhere in our bodies... our own inborn intelligence is far superior to anything that we can substitute from the outside."

What is the Chiropractic Meaning of Life?

We have already defined Universal Intelligence as the organizing principle that holds our universe together. **Life is the expression of Universal Intelligence through Matter.** How is that possible? It is the purpose of Universal Intelligence to create Life Force. Life Force unites Intelligence with Matter. Life Force is expressed in your body as electrical signals carried throughout your nervous system. Thus, Life is a union of 3 necessary factors: Universal Intelligence, Life Force and Matter. (Triune of Life) Universal Intelligence is always 100% or the order in our universe would collapse. Universal Intelligence always creates 100% Life Force. In other words, the producer knows how much needs to be in the product.

Where does this triune break down and become less than perfect? For perfection of this triune there must be 100% Intelligence, 100% Life Force and 100% Matter. First, what if there is less than 100% matter? A body may be missing an arm or a leg, or maybe an organ has been removed from a surgery. This would hinder the expression of intelligence. Secondly, there can be a breakdown between Life Force and Matter, creating a situation where the delivery of Life Force to Matter is less than 100%. Like interrupting a circuit or closing a road, subluxation can interfere with the transmission of Life Force to Matter. A subluxation is an interference to the expression of the organizing force of the universe through you. The subluxation separates the producer from the product. There is a disconnection. That is why subluxations have devastating effects on life and health. The chiropractic adjustment removes interference to the transmission of Life Force, reuniting Universal Intelligence with Matter (your body). Is your body expressing 100% life? How would you know?

Edison Chiropractic
Wellness Center
Dr. Sean T. Edison
105 S. Pearl Street
Tecumseh, MI 49286
423-WELL

The power that created the body maintains and heals the body as long as there is no interference.
